

# Evolution Methodologies™ (EM)

## End-to-End Coverage for your Business

### END-TO-END COVERAGE

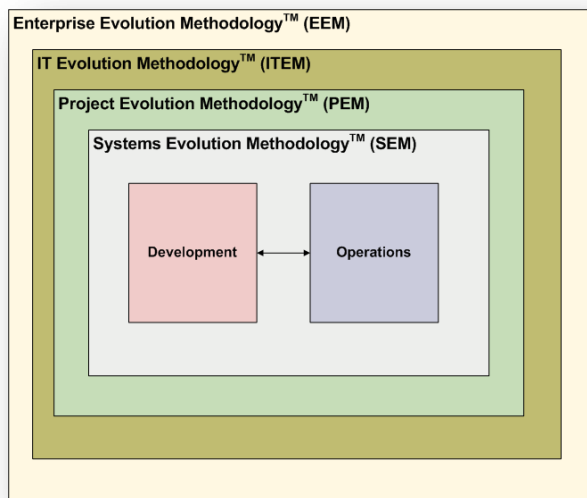

Eliminate fragmented communication and collaboration.

### TIGHT INTEGRATION

Tight integration ensures that information flows and is readily available throughout the enterprise.

### GOVERNANCE

Easily govern your business and IT processes. Identify risks and take corrective actions. Implement continuous process improvement to ensure your processes change with your business needs. Be proactive, not reactive!

- Powerful, scalable, flexible! EM easily adapts to your organizational needs.
- Easy to read processes and workflows provide common understanding throughout the enterprise.
- Traceability and accountability provide proof of compliance with Government regulations every step of the way.
- 100% integrated with Phoenix Suite™ ensures you have the automation and reporting power you require.

The Evolution Methodologies™ (EM) is a collection of workflows, processes, tasks, and best practices that quickly adapt to your organizational needs! Eliminate the headaches associated with integrating multiple methodologies only to create more undesired chaos.

EM ensures that your critical business areas are visible to Executive Management and on-demand reporting allows you to easily put together presentations and justifications of your department's business requirements. Readily accessible information means better decision making.

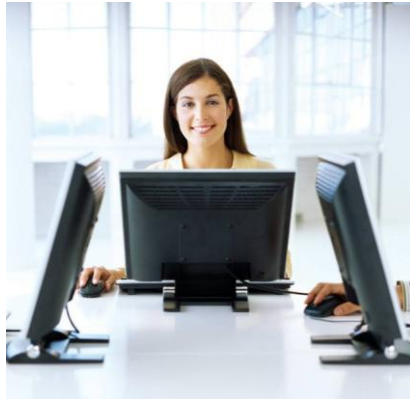

EM empowers your organization to be proactive, not reactive. Have clear visibility into your business and IT operations and take steps to improve those areas.

One of the key ingredients to a successful organization is the smoothness of how it operates. Bad processes lead an enterprise to become stagnant and uninventive---resulting in lost market share, revenue, and market opportunities.

EM is customized to fit your organization's unique business model and thus, maximizes your ROI! Designed to be invisible when in use, EM soon becomes a way of life, not a constant obstacle that your employees resist at every turn.

Start today and join the community of satisfied clients that recognize the significant benefits associated with using a world-class enterprise set of methodologies!

# Features and Benefits

## AUDITING

Provide auditable information on-demand for internal and external audits. EM ensures that information is only a few clicks away and available when you need it most.

## STANDALONE

Not ready for a full EM implementation? Simply identify the areas that will provide the most benefit to your organization and plug it directly into your existing environment.

## DETAILED REPORTING

Always know the current state of your business and IT practices with EM's detailed reports.

For more information on any of our products or services please visit us on the Web at:

<https://www.ldp-solutions.com>

EM is tightly integrated with Phoenix Suite™ which is a collection of tools that provide automation and reporting of your organization's key inputs and outputs.

Eliminate the hassle of trying to get disparate methodologies to communicate with each other. They were not designed for this and thus, rarely add value and become counter-productive. EM provides you with a one-stop-solution for all of your business needs.

Start with the complete framework or select the areas that give you the most benefit. LDPS consultants are available to assist you with the creation of an implementation roadmap that allows you to grow and expand as your business requirements change.

## Key Benefits

- Complete end-to-end process coverage for your entire enterprise.
- Tight integration provides seamless transitions from component-to-component.
- Can be used in standalone fashion---take what you need and integrate into your existing environment.
- On-demand, detailed reporting capabilities provide assistance during critical times---such as during audits.
- Powerful, flexible, and scalable---EM grows and adapts to your unique organizational needs and requirements.
